

Industrial Custom Products

Your single source for custom parts & products

About Us

Dear Friends:

Industrial Custom Products (ICP) started in 1955 in Minneapolis, Minnesota as Industrial Gasket Company, a die cutter of industrial gaskets. Over the last 50 plus years, the company has grown to become an award winning developer of high quality custom parts and products and a stocking distributor of major brand plastic sheet.

The foundation of the company is our **absolute unyielding commitment to high quality work and on time delivery** as evidenced by the numerous quality awards earned from working with some of the most successful companies in the world.

ICP is **unique UpFront**, in the way our experienced and creative team **recommends the most cost efficient manufacturing processes and materials to make your part or product** and in the quality review according to the ICP ISO 9001:2000 procedures.

Over the years, the capabilities of ICP have grown to include a family of six quality award winning **QuickTurn Manufacturing Processes** that all work together to **maximize production cost efficiencies for you**.

With this growth, ICP has become your **SingleSource for custom parts & products**:

- Multiple manufacturing processes to make outsourcing easier for you
- Multiple processes applied to a part or product by a **SingleSource**

Our vision is to be the most efficient producer of high quality parts and products in the United States.

We are well positioned to serve your needs into the future. We are looking forward to working with you.

Sincerely,

Herb Houndt
The ICP Management Team
